SANCTION LETTER

Dear Sir / Madam,

To the reference of the letter on 08/08/2020 our elite technical team visited your campus on 13/08/2020 and had fair rounds of discussions with the faculty and technical members and apprised them with the project requirements. We are extremely satisfied with the infrastructure and software available in your engineering College that suits our requisite norms.

We are glad to allot the project work to your department. We are looking forward to work with the Megha Institute of Engineering and Technology for Women, the accomplishment of this project.

Thanking you Sir,

Regards

CONSCIENCE TECHNOLOGIES
Managing Director

- Details of Project work are attached along with this sanction letter.

PROJECT WORK DETAILS

TITLE : Auto sanitization unit

Duration of the Project to be completed : Three Months

Amount for carrying out the Project work : Rs 1,12,000/-

Abstract of the Project -

The project requirements are

The sanitization unit is to be developed at strategic places to help the people sanitize conveniently using automized unit. In this process your company is expected to design an automized sanitization unit with the following requirements.

1. Identify sensors units to detect the people.
2. The sensor unit detects the people and send a signal to microcontroller unit.
3. The micro controller unit sense the signal and operate a motor to sprinkle sanitization material.
4. All the above requirements must be integrated to execute the project.

The units sizes differ from place to place

The units sizes and the place where they will be placed such information will be given by our organization.

You are expected to design the above project and give a demo after the final product.

Your organization must Design and implement above application as a proof of concept.
The Automated door lock tem has been

Completed project to be submitted on : 16/11/2020

Release of Payment : After completion of the project on satisfactory note.

PROJECT WORK DETAILS

TITLE : Automatic electric door lock control

The project requirements are

To develop a module to control the electric door based on the human health condition. Based on the sensed physiological parameters such as Temperature, Humidity, and Heartbeat.

Your organization is to interface the sensors to the controller unit. Your organization will fulfill the following requirements.

1. In normal condition the door is in lock position.
2. In abnormal condition the sensor gives signal to the micro controller unit.
3. When the signal is received to microcontroller the door is open.
4. The microcontroller reads the signal which show the abnormality of human being and open the lock for the outsider.
5. The project must support future requirements to sense the other physiological parameters of human being.

Your organization must Design and implement above application as a proof of concept.

Duration of the Project to be completed : Two Months

Amount for carrying out the Project work : Rs. 80,000/-

The Automated door lock system has been

Completed project to be submitted on : 30/09/2017

Dear Sir / Madam,

SUB: Consultancy Projects – Regarding.

Megha Institute of Engineering and Technology for Women, focuses on the overall development of its faculties and students. The college encourages students and Faculty, to participate in Research Innovative Projects, and in all activity based learning, to ensure that they are fully groomed graduates for all overall development which results in intellectual growth and development of our students as future engineers, to suit the growing needs and aspirations of the nation in future.

The labs are equipped with excellent infrastructure and equipment to enable the students to excel in their field of engineering through practical experimentation studies and to pursue their research ideas. The faculty of the college are well experienced and well trained. Research Centers have established in all the departments.

Our department offers Technical support Assistance to Consultancy projects. We work as a Team to accomplish the task collectively, since we coordinate with your work. I expect a positive response from your side.

Thanking You Sir,

Yours Sincerely,

PRINCIPAL.

SANCTION LETTER

Dear Sir / Madam,

To the reference of the letter on 04-08-2016 our elite technical team visited your campus on 07-08-2016 and had fair rounds of discussions with the faculty and technical members and apprised them with the project requirements. We are extremely satisfied with the infrastructure and software available in your engineering College that suits our requisite norms.

We are glad to allot the project work to your department. We are looking forward to work with the Megha Institute of Engineering and Technology for Women, the accomplishment of this project.

Thanking you Sir,

Regards

Embedded Software Labs,
Managing Director

- Details of Project work are attached along with this sanction letter.

PROJECT WORK DETAILS

TITLE : Fake currency identification

Duration of the Project to be completed : Two Months

Amount for carrying out the Project work : Rs, 75,000/-

Abstract of the Project -

The project requirements are

Our company provides software as a library files. The software tests the genuine & fake currency. Your Organization role is to identify a microcontroller unit with camera and display facility. Your role is to identify the microcontroller unit which as enough memory to support software loading and read the currency data through camera and execute library files to test the currency and identify the genuinity.

Your organization must Design & implement above application as a proof of concept.

Completed project to be submitted on : 11/10/2016

Release of Payment : After completion of the project on satisfactory note.
