

3.2 Innovation Ecosystem

3.2.1 Institution has created as Ecosystem for Innovation including Incubation centre and other initiatives for creation and Transfer of knowledge

Innovations need to be inculcated as a habit in the mankind. The one who invents does not consider it to be immensely rewarded or a big thing that has an end to solutions. Inventions are always the beginning of larger sphere of means that solves the problems and creates the thrust for the new problem identification and solutions. On the Institutional level, the Innovations have been revolving more around the curriculum deployment and off late it was realized that the product is the student's knowledge rather accumulated scores. Personality development of the students is the crux of education today. The Innovation ecosystem must revolve around making the student a competent personality. Research and Exploration to experience something new is the aim of Innovation in Education which encourages the faculties and students to nurture their talent. Problem solving is the core of innovations and the desired results are the base of planning innovations. Creative and fruitful outcomes are results of Innovation in Education.

We have facilities for Research Programs with well-equipped and state-of-the-art research laboratories and experienced faculty members who play the significant roles in promoting and providing conducive atmospheres and overall environment for Learning and Teaching. Our Innovation in this regard encompasses various programs and seminars by global leaders in the field for Information Technology.

At our Institution, we encourage the faculty members to enhance their knowledge and encourage them in Research and Development in their own fields of expertise and also the research and development of the other related skills, So that we get closer to perfection in our endeavours. We also encourage our faculty members to have interactive sessions from the respective industries, so that they have hands-on information about the particular skills. We nurture this concept with additional inputs like regular class work, by internal faculty, Guest lectures, and e-talks by

entrepreneurs. We strive hard towards making our faculty comfortable and also motivate them to publish journals and conduct and attend seminars in an effort to reach world-class standards.

Our Institution provides the platform for students to become Entrepreneurs and encourages them to become the way and destination rather than seekers of the same. We encourage field trips and industrial visits for the students on a regular basis to fine tune their skills and become job-ready. Workshops, Seminars, and Guest lecturers are being organised by the Institution for students to boost their learning process in their respective fields with notable individuals from the industry. At frequent intervals, faculty members are encouraged to share their technical exposure and specialized knowledge with other faculty members through talks. Faculty members are regularly encouraged to pursue higher education and are actively engaged in research, with many papers published in national and International journals. Seminars, conferences, workshops, and short-term courses are all encouraged for faculty members. The staff is given sufficient encouragement to innovate and alter the Teaching and Learning Process.

Innovation enhances the standard of the education as it induces faculties & students to adopt a better way of thinking to solve problems. World of education has found a way to better involve with society, enhance the delivery of curriculum, gauge the improvement of students in improvised way, nurture the intellectual property at the Institutions, maintain and develop the administrative profile of the Institutions.
